

## Combining PDFs

The following program combines several pdf files into a single pdf [combined.pdf]. Only the first pdf file has a cover, for the following pdf files the cover has been removed. The pdf files are sorted in alphabetical order.

### Scripts:

- **combiningPDF\_Main.py** - main function:
  - Creates an instance of PDF\_operations()
- **operationsPDF.py** - PDF\_operations() class with the following methods:
  - `__init__`
    - constructor
  - ListPDFs
    - Displays all the pdf files in the current work directory
  - Combining
    - Erase the [combined.pdf] file if already exists.
    - Combines all the pdf files listed by ListPDFs method into the [combined.pdf] file
